CAREER PROFILE

A front-end enthusiast who loves using React.js to create engaging user interfaces that really stand out in Australia.

🚀 Here's what I bring to the table:

💻 **Front-End Development:** I thrive on building responsive, high-performance single-page applications (SPAs) using React.js/Redux.js, enhancing code maintainability and reusability through a component-driven approach.

🎨 **CSS Libraries:** I'm adept at harnessing CSS libraries like Bootstrap and Tailwind to create visually appealing interfaces while ensuring consistency and elegance across diverse devices.

⚙️ **Back-End Proficiency:** My command over Node.js empowers me to seamlessly merge front-end and back-end technologies, delivering a seamless experience to users.

🗄️ **Database Expertise:** With a strong familiarity with MongoDB, I skillfully design and manage databases, ensuring efficient data storage and retrieval.

🌐 **Seeking Opportunities:**

Currently, I'm on the lookout for front-end development opportunities in Australia. I'm excited to contribute my expertise to dynamic projects that push the boundaries of user experience. Let's connect and explore the possibilities!

EDUCATION

React Development

June 2023 - August 2023

General Assembly Australia

Full Stack Web Development

March 2023 — November 2023

JR Academy

SKILLSET

Front-end: HTML5, CSS3, SASS/SCSS, JavaScript(ES6), Bootstrap, Tailwind, React/Redux

Back-end: MongoDB, Node.js, MySQL

Others: Git/Github, AWS

PROJECTS

Country Info Search

Demo: <https://haoyuan1122.github.io/countries-info-search>

Github: <https://github.com/HaoYuan1122/countries-info-search>

Intro: This project is an app designed to assist users in searching for detailed country information by querying country names or codes. The project is built using React and Bootstrap. Through this project, I learned how to use React to fetch data from an API, store the API key in environment variables, configure routes using React Router, and deploy a React app on GitHub.

Michael Yuan's Portfolio

Demo: <https://haoyuan1122.github.io/porfoliio>

Github: <https://github.com/HaoYuan1122/porfoliio>

Intro: This is my first personal project where I created a portfolio using fundamental HTML, CSS, and Bootstrap. Bootstrap was used to achieve responsive design.
